PUBLICATIONS

YouTube și combaterea radicalizării

[2017]
https://intelligence.sri.ro/youtube-si-combaterea-radicalizarii/

ISSN 1844-7244

While hybrid threats are on the rise, terrorists are constantly deploying various tactics to achieve their goals. The online environment serves their purpose conscientiously. Meanwhile millennials have replaced traditional television with YouTube, making it easier for extreme ideologists to expose their ideas and recruit followers. This article intends to analyze how people are exposed to extreme ideologies using the biggest online video platform and how YouTube uses strategies to prevent the expansion of the phenomenon.

Gardienii datelor personale

[2018]
https://intelligence.sri.ro/gardienii-datelor-personale/

ISSN 1844-7244

The world is constantly changing, and we all need to keep up. Implementing change and procedures at the workplace, can only be effective when it comes from the management. For the efficient use of company resources, the decision makers must have a thorough understanding of both new technology's utility, and the cybersecurity environment. Moreover, the user should be an active part of the security strategy of the organization, meaning that all who have access to the grid should follow default procedures.

Cum navighezi mai sigur pe internet

[2018]
https://intelligence.sri.ro/cum-navighezi-mai-sigur-pe-internet/

Most of us perceive private data lightly, although as part of the global community we need to reflect and understand what recent data breeches and private data policy has brought to our attention. We have to identify and apply effective measures because safeguarding our privacy is the new battle to win and it is our responsibility to take steps to achieve this goal. There are few tools that can protect our data while navigating or exchanging messages on the Internet. Although these tools are not completly unassailable, they are far better than having no protection at all.

Amenințarea din interior (insider threat)

[2018]
https://intelligence.sri.ro/amenintarea-din-interior/

Insider threat is one of the most damaging dangers that can impact on an organization. In such a case the menace comes from the people within the organization, employees, former employees or associates who have access to inner data, security practices, and information systems. There is a wide range of reasons for an employee to disclose secret information, varying from revenge to family problems.

There are also various organizational issues that can lead to data leaks. Using better corporate procedures, training, inter-community and network surveillance, both sensitive data and jobs can be properly safeguarded.

Social Media Takes A Toll On Democracy

[2018]
https://www.afahc.ro/ro/rcic/2018/rcic'18/volum_2018/411-416 Lascațeu Gogoasa.pdf

ISSN 2285-2689

This paper will analyse how social media is weaponised to achieve political gain over recent elections as a part of an effective toolset aimed at influencing public scrutiny. The purpose of this article is to establish if turning social media into a means of control over the population is a part of a greater operation to generate popular misperception and increase one actor's power, or it represents the new age exertion of soft power beyond privacy rights and international regulation.

Obiectivele războiului rus

[2018]

https://www.academia.edu/39750525/Obiectivele_războiului_rus

The post-Cold War world gave means and opportunity for states like Russia to try and assert their global influence through peaceful means, remotely control the ex-soviet countries through economic and energetic domination and influence western countries with a set of strategies that define hybrid warfare aimed at the core of its adversaries' source of political power, at population. This paper will analyse what hybrid Russian war means lately, its objectives, and what are the best practices to face future asymmetric threats such as the ones deployed by Kremlin in the past 5 years.

The Collision Between Public Policy and Technology Raises The Stakes for Users

[2018]

https://www.ceeol.com/search/article-detail?id=875045

The paper will analyse what part data and confidentiality for security plays and how a continuous development of policy and strategy can answer the questions raised by technology and hybrid threats to national security. It will follow the lines European policy draws given the latest threat development and will revolve around what changes form the user's perspective. Therefore, from necessity to strategy, to enforcement, the first step is identifying and addressing one issue in a common manner.

Teaching The Principles Of National Security Framework

[2019]

https://www.researchgate.net/publication/340127572_TEACHING_THE_PRINCIPLES_OF_NATIONAL_SECURITY_FRAMEWORK

During the training process the trainer and participants are continuously interacting. Like any group interaction most participants think and talk together on two levels of interaction, the topic and the process. Teaching the principles governing national security can be a challenge but also a worthwhile experience. From an academic point of view, it involves an interdisciplinary comprehensive approach combining public policy, national values, normative outline, regional context and practice. Given the constant evolution of policy derived from new security challenges, training national security faces updates and changing practice which address relatable issues that participants can address. Correspondingly, the training's learning objectives should be both towards building knowledge about how the national security system functions in connection to the newest challenges to national security, but also to learning the means and proper action based on the ethics involved in the national security field. Ultimately, the main goal is to achieve a greater understanding of the national security framework and the funding principles that set it in motion among students and build a integrity based behaviour among young professionals.

Date și state. Controlul teritoriului digital

[2019]

https://intelligence.sri.ro/date-si-state-controlul-teritoriului-digital/

Authoritarian states are prone to keep a tight control over digital data within their borders and over the exchange of digital data with the exterior. These countries urge both national and foreign companies to keep collected data inside the state borders. The aim is to ensure the same state control on digital data as it is exerted over the national territory. Controlling and accessing digital data, authoritarian governments can preserve their power and forestall the spread of criticism.

Democracies, such as European Union member states, have a different approach, urging national and foreign companies to ensure data protection and privacy for their citizens, regardless of where the data are stored.

Culegerea de informații. Etalonul etic

[2019]

https://intelligence.sri.ro/culegerea-de-informatii-etalonul-etic/

Even though the world of intelligence is either driven towards a system governed by rules and regulations, either focused on results, there will always be limits to what can be done under the umbrella of secrecy.

In pursuing their mission, intelligence agencies face not only legal but also ethical issues concerning the data collection process. The means involved require intrusion in private life, and thus a fundamental human right violation.

Ethics and Management in National Security

[2020]

The aim of the study is to address the importance of placing ethics in intelligence activities where the role of leadership in national security sector is a determinant of organizational ethics. From the decision-making level, the focus is on respecting the principles of the rule of law while prioritizing the implementation of sustainable action plans in fulfilling the mission of national security but respecting the universal values of human rights.

Culegerea de informații de securitate națională în era digitală - dimensiunea etică

The study is aiming to convey an interdisciplinary analysis to what gathering intelligence in

digital space represents from a legal point of view and what the lack of ethics of such state governed

endeavours cause to a democratic society by examining the latest case studies in European and

international jurisprudence. To sort out the necessities and scope of intelligence in cyberspace we use

the realist, consequentialist and deontological ethical filters in order to realize how developing

technologies are connected to the moral compass embedded in human nature.

Dimensiunea etica a culegerii de informatii digitale

[2021]

Although this thesis comprises a legal approach, it conveys a point of view formed in a multidisciplinary perspective. The chosen topic and the examples used in the research are updated to today's rigors and will use contemporary legal analysis of the digital age extending to the following main precepts: individual freedom, protection against threats, promotion of a just society, determination of the common good and the public interest, application of the general principles of fairness and justice, the protection of human rights, the exploration of the integrity and honesty issues, observing the appropriate limits of state intervention in a democratic society, recognizing and managing conflicts of interest and addressing broad perspectives on the means of action in gathering digital intelligence that is appropriate duties entrusted by the citizen to intelligence officers.

Legal Practitioners`Union in Romania

[Bucharest, 2017]

Uniunea Juriștilor din România s-a constituit cu actuala sa structură în ziua de 21 decembrie 1989 și a dobândit personalitate juridică în 20 ianuarie 1990, ea continuând activitatea anterioară desfășurată de Asociația Juriștilor.

Uniunea Juriștilor din România desfășoară o bogată activitate științifică în domeniul dreptului. Această are, în principal, două componente:

1. ACTIVITATEA PUBLICISTICĂ

2. ORGANIZAREA DE MANIFESTĂRI ȘTIINȚIFICE

În domeniul publicistic, UJR editează publicațiile "Dreptul" (directorul publicațiilor: prof. univ. dr. Ovidiu Predescu) care reunesc:

■ **Revista "Dreptul"**, editată lunar pe suport de hârtie și suport electronic ujr.revistadreptul.ro

■ **"Law Review"**, cu apariție , format online www.internationallawreview.eu

Împreună cu Societatea "Titu Maiorescu" se editează revista lunară de informare și cultură juridică **"Palatul de Justiție"**.

Manifestările științifice se organizează, de regulă, trimestrial, ele având drept scop dezbaterea unor probleme importante ale actualității juridice.
